Formula One and F1 Racing News and Stories

The term Semi automatic should not be confused with Road car alternatives, in F1 terms it means the normally Manual gear selection is managed by electronics and hydraulics.

F1 transmissions

In Formula One, the DRS opens an adjustable flap on the rear wing of the car, in order to reduce drag, thus giving a pursuing car an overtaking advantage over the car in front. The FIA estimate the speed increase to be between 10-12 km/h by the end of the activation zone. When the flap is closed it increases downforce, giving better cornering.
