Lovelock formulated the Gaia Hypothesis in journal articles in 1972 and 1974, followed by a popularizing 1979 book Gaia: A new look at life on Earth. An article in the New Scientist of February 6, 1975, [41] and a popular book length version of the hypothesis, published in 1979 as The Quest for Gaia , began to attract scientific and critical attention.

### Gaia hypothesis - Wikipedia

An intriguing new look at our planet. Lovelock extols the need for a more holistic approach to science after its centuries of moving towards ever more specialization and reductionism. 'Gaia' is the metaphor for his top-down look at Earth - literally - and what makes it 'tick'. He makes the reader aware of the adaptability of life to whatever conditions prevail and the consequent near-impossibility of achieving lasting equilibrium (as of a dead planet).
