The Konica AUTO S2 is the second camera in the Konica AUTO series, the first being Konica AUTO S from 1963. The Konica AUTO series were some of the first cameras to put high quality rangefinders in the point and shoot market, with their auto exposure options, competing with Canons first Canonet coming out a few years earlier.

The Konica Auto S2 is a Japanese 35mm compact rangefinder camera that was produced in 1965 by Konishiroku Photo Industry Company. The camera has a non-interchangeable Konica Hexanon 1:1.8-16 45mm lens with a meter cell located on lens front top and a built-in pop-up hood for flare reduction. The viewfinder also features automatic parallax correction. It was also sold in the U.S. as the Wards am551.

To see more photos from this camera, see my Konica Auto S2 gallery. I liked the Konica Auto S2 a little better than my Yashica Electro 35 or my Minolta Hi-Matic 7, but not as much as my delightful Yashica Lynx 14e with its outstanding f/1.4 lens. In a fast-lens contest, that Yashica wins hands down. But either of these cameras is a great choice.

(3) The “Konica S III” (1963): The final camera of the S series line, offering a new 47mm f/1.9 lens. This is a rare bird, and the end of the line for the original “S” series. Check out this nice review on it.. The Auto S and Auto S2 . In 1963, Konica introduced its advanced Auto S camera. Using the same 47mm f/1.9 lens from the contemporary Konica S III, it added an off-lens coupled ...
