Seadoo Engine Codes

What are sea doo fault codes? Sea-Doo fault codes are trouble-shooting codes that are stored on your jet ski's onboard computer or EMS (Engine Management System). The EMS will activate an error or fault code on your handlebar display if you have a problem with any of your jet ski systems. While Sea-Doo tries to ensure the quality of all their watercraft, there may be frustrating times when a 'fault' occurs.

P0340 Meaning The Camshaft Position Sensor is an electronic device used in an engine to record the rate at which the camshaft is spinning. This information is used by the Engine Control Module() to control ignition and fuel injection. The camshaft position sensor senses the retraction of camshaft (intake) to identify a particular cylinder.
