program, direct Windows API calls are rarely needed. Instead, programs create objects from Microsoft Foundation Class classes and call member functions belonging to those objects.

Microsoft Foundation Class Library - Wikipedia

Those APIs are themselves written

Get Free Windows Programming With Mfc

mostly in C. There's more than one way to create a native desktop app: You can program using the Win32 APIs directly, using a C-style message loop that processes operating system events. Or, you can program using Microsoft Foundation Classes (MFC), a lightly object-oriented C++ library that wraps Win32. Neither approach is considered
